## steni<sup>®</sup> colour

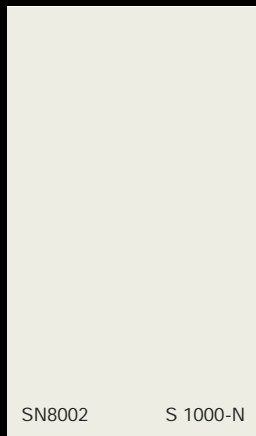

**steni colour** is supplied in 40 standard colours. In addition, **steni colour** can be supplied in almost all colours based on the RAL, BS and NCS colour systems. **steni colour** facade panels are made of polymer composite, with an acrylic surface, hardened by electro beam curing. **steni** facade panels have unique qualities, high durability and are supplied with the best guarantees in the market.

During development and production of **steni** facade panels, we also emphasize on environmental issues. This applies to both resource and energy consumption during the production process, as well as the final product's impact on the environment. Tests confirm that **steni** facades are among the most environmental friendly products on the market.

## Create the facade design of the future with steni colour

Create the facade design of the future with steni colour. Shades-within-shades or contrasts, surfaces with different glosses, or **steni colour** in combination with glass, steel, wood or aluminium. Creativity is limited only by the imagination.

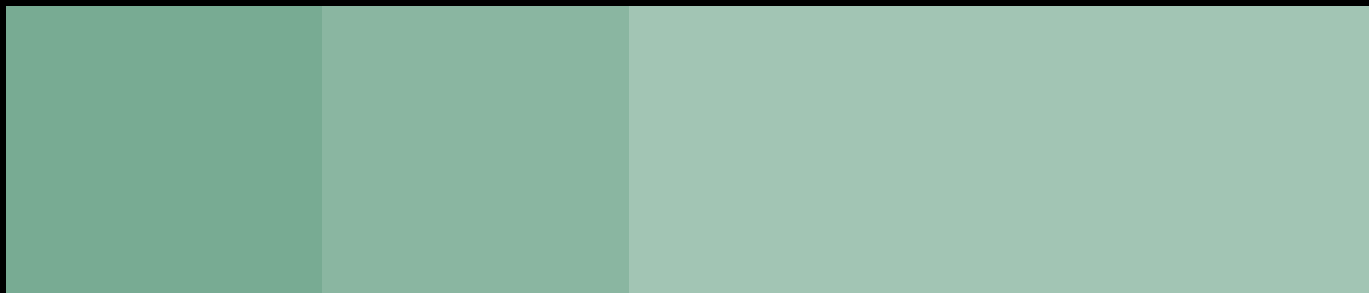

## Choose between 3 glosses of steni colour

**steni colour** is supplied in three different glosses,  
high gloss (gloss ca 70), half matt (gloss ca 20) and matt (gloss ca 3).  
A large selection of colours and the various degrees of gloss – alone or in combination  
– provide unique opportunities for the creation of a future-oriented facade design.

### High gloss, half matt and matt

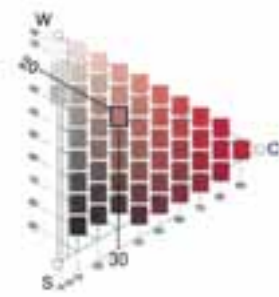

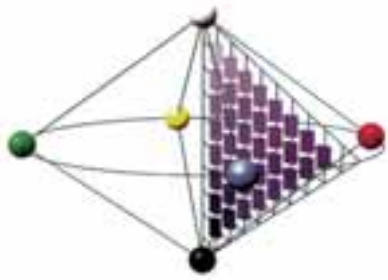

The various degrees of gloss bring out nuances in the colours,  
based on the same colour number.

## NCS Colour system

In the 3-dimensional NCS figure all the colours can be identified and numbered. The figure is further divided into a circle and a triangle for easier understanding. Colour example: **S 2030 – Y90R** is marked in the triangle and circle: 20% black (amount of white is not specified) and 30% colouration by the colour: Y90R = yellow (Y) with 90% red (R). S refers to the second edition of colour codes from NCS.
